## Task:

To create a drawing by using Canvas with Zoom in/out option. The symbols with in the square box should be clear while zoom out.

As shown in the below diagram, please follow the below steps:

- Inside square box, the details should be drawn without using icons
- In first column, each block should have **Triangle** symbol
- In Last column, each block should have Circle symbol
- In intermediate column, should have \*and \* in alternative column
- Within the Empty block, at each corner of the cell you can have symbols like (RE, \$,
  \*) and centre of that block the number should be given as 1, in which the maximum font size should be 14 and while zooming out it should be visible clearly

**Note:** The below image shows the results for 4 columns. User can increase the number of column size and should follow the above steps.
